RUDRA CHAUHAN

Computer Engineering Student
Surat, Gujarat | +91 92658 71361 | rudrafordocs@gmail.com | Portfolio | GitHub

PROFESSIONAL SUMMARY

Computer Engineering student specializing in AI/ML, full-stack development, and intelligent software systems. Experienced in building RAG pipelines, computer vision applications, secure APIs, and cloud-deployed products using React, FastAPI, Python, and modern AI tooling.

CORE COMPETENCIES

AI Application Engineering · RAG & LLM Systems · Full-Stack Development · Computer Vision · REST API Development · Secure Software Design · Cloud Deployment · Product Development

EDUCATION

B.E. Computer Engineering, Minor in Data Science — C.K. Pithawala College of Engineering & Technology (GTU), Surat
Jul 2023 – 2027 (Expected) CGPA: 8.22/10

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C, C++, SQL

Frameworks: React, FastAPI, Flask, Vite, Tailwind CSS

AI/ML: RAG, LLMs, Computer Vision, Sentence Transformers, scikit-learn, Prompt Engineering

AI Tools/APIs: Groq, Google Gemini, OpenAI, Ollama

ML Tools: Orange, Weka

Databases: SQLite, PostgreSQL, ChromaDB, Firebase , MongoDB, Supabase

Cloud & DevOps: Docker, Docker Compose, Vercel, Railway, Render, Nginx

Tools: Git, GitHub, Swagger

PROJECTS

Sarva Sense — RAG-Based Intelligent Machine Troubleshooting Assistant —*React · TypeScript · FastAPI · ChromaDB · SQLite · Groq · Gemini · Python | GitHub| Demo*

- Engineered a RAG-based troubleshooting assistant that retrieves relevant machine-manual sections using semantic similarity and exact error-code matching, providing grounded diagnostic guidance.
- Built a structured document-processing pipeline using PyMuPDF/pdfplumber, hierarchical chunking, and Sentence Transformers to preserve machine models, sections, error codes, and technical context during retrieval.
- Integrated Gemini-powered HMI/image analysis with a FastAPI backend and ChromaDB vector store, enabling technicians to combine machine documentation and visual error information for faster troubleshooting.

CVision — Intelligent Resume Screening Platform — *React · TypeScript · Firebase · Vite | GitHub | Demo*

- Designed a recruiter-facing resume screening platform on a serverless Firebase backend (Auth, Firestore, Storage), isolating all Firebase logic behind a dedicated services layer and enforcing account-scoped data isolation via granular Firestore rules and route guards at both client and database layers.
- Built a deterministic, rule-based resume-parsing pipeline for skills and experience extraction, ensuring every parsed field traces to a visible rule for fully explainable candidate summaries.

PROFESSIONAL EXPERIENCE

Remarkskill Education — *Ethical Hacking Intern* Jun 2025 – Jul 2025

- Conducted hands-on vulnerability assessments under project supervision, applying structured methodology to identify and document security weaknesses.
- Authored a capstone vulnerability assessment report translating findings into prioritized, actionable remediation guidance.

YBI Foundation (Virtual) — *Python Programming for AI & Data Science Intern* 2 Weeks, Jul 2026

- Completed hands-on training in Python programming, data handling, and analytics workflows for AI and data science applications.

HACKATHONS & ACHIEVEMENTS

Technoism 2026 (1st runner up) ·Techmanthan 2026 (Winner) · Climate Data Hackathon 2026 (Finalist) · Hack & Forge 2026 (Participant) · VCET Hackathon 2026 (Semi - Finalist)

CERTIFICATIONS

IBM Generative AI for Data Scientists (Coursera, 2026) | Verify Credential · **NPTEL Data Mining** (IIT Kharagpur, 2026)
