RUDRA CHAUHAN

Computer Engineering Student
Surat, Gujarat | +91 92658 71361 | rudrafordocs@gmail.com | Portfolio | GitHub

PROFESSIONAL SUMMARY

Computer Engineering student specializing in AI/ML, full-stack development, and intelligent software systems. Experienced in building RAG pipelines, computer vision applications, secure APIs, and cloud-deployed products using React, FastAPI, Python, and modern AI tooling — including local, open-weight model deployment with Ollama.

CORE COMPETENCIES

AI Application Engineering · RAG & LLM Systems · Full-Stack Development · Computer Vision · REST API Development · Secure Software Design · Cloud Deployment · Product Development

EDUCATION

B.E. Computer Engineering, Minor in Data Science — C.K. Pithawala College of Engineering & Technology (GTU), Surat Jul 2023 – 2027 (Expected)
CGPA: 8.22/10 | Currently in 7th Semester

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C, C++, SQL
Frameworks: React, FastAPI, Flask, Vite, Tailwind CSS
AI/ML: RAG, LLMs, Computer Vision, Sentence Transformers, scikit-learn, Prompt Engineering
Open-Source & Local AI: Ollama, Gemma, open-weight model deployment, Groq, Google Gemini, OpenAI
Databases, Cloud & Tools: SQLite, PostgreSQL, ChromaDB, MongoDB, Supabase, Firebase, Docker, Vercel, Render, Nginx, Git, GitHub, Swagger

PROJECTS

Sarva Sense — RAG Troubleshooting Assistant — *React · TypeScript · FastAPI · ChromaDB · Groq · Gemini* | GitHub

- Engineered a RAG-based troubleshooting assistant that retrieves relevant manual sections via semantic similarity and error-code matching, pairing a FastAPI backend with a ChromaDB vector store to deliver diagnostic guidance.
- Built a structured document-processing pipeline (PyMuPDF/pdfplumber, hierarchical chunking, Sentence Transformers) that preserves machine models, sections, and error codes during retrieval, and integrated Gemini-powered image analysis so technicians can combine manuals with visual error context.

CVision — Intelligent Resume Screening Platform — *React · TypeScript · Firebase · Vite* | GitHub

- Designed a recruiter-facing resume screening platform on a serverless Firebase backend (Auth, Firestore, Storage), isolating all Firebase logic behind a services layer and enforcing account-scoped isolation via Firestore rules and route guards.
- Built a deterministic, rule-based resume-parsing pipeline for skills and experience extraction, ensuring every parsed field traces to a visible rule for fully explainable candidate summaries.

MyThali — Privacy-First AI Food Analyzer — *Python · FastAPI · Ollama · Gemma · SQLite* | GitHub

- Built a privacy-first food analyzer that runs Gemma locally through Ollama to read nutrition labels and meal photos, separating AI perception from decision-making so allergen and diet verdicts are computed by a deterministic rule engine, never the model.
- Designed a verify-and-retry harness that catches arithmetic-impossible label readings and prompts the model to re-read before accepting a result, improving field accuracy with no hosted API calls or outside data requests.

PROFESSIONAL EXPERIENCE

Remarkskill Education — *Ethical Hacking Intern* Jun 2025 – Jul 2025

- Conducted vulnerability assessments under project supervision, applying structured methodology to identify and document security weaknesses.
- Authored a vulnerability assessment report translating findings into prioritized, actionable remediation guidance.

YBI Foundation (Virtual) — *Python Programming for AI & Data Science Intern* 2 Weeks, Jul 2026

- Completed training in Python programming, data handling, and analytics workflows for AI/data-science applications.

HACKATHONS & ACHIEVEMENTS

Hacktoberfest Hack Day Surat 2026 (Winner) · Hacktoberfest MLH Vadodara 2026 (Winner) · Techmanthan 2026 (Winner) · Technoism 2026 (Runner-Up) · Climate Data Hackathon 2026 (Finalist) · VCET Hackathon 2026 (Semi-Finalist) · Hack & Forge 2026 (Participant)

CERTIFICATIONS

IBM Generative AI for Data Scientists (Coursera, 2026) | Verify Credential · **NPTEL Data Mining** (IIT Kharagpur, 2026)
